COMBAT PROVEN FUTURE READY

AT4 ONE FAMILY – DIFFERENT NEEDS

The AT4 family is a range of lightweight, man-portable, fully disposable weapons characterised by ease of use and handling. This means they do not require expert gunners to operate the weapon effectively. All AT4 weapons are single shot and fully disposable. You simply aim, fire, destroy the target and discard the empty tube.

Furthermore, the AT4 family has proven itself to be a highly reliable, robust and durable weapon system that has been extensively proven in combat. Its key characteristics include high target effect and hit probability – creating a high target kill probability for each fired weapon.

AT4	CONFINED SPACE	TYPICAL RANGE (m)	CAPABILITY	WEIGHT (kg)	EFFECT	SIGHT
HEAT	No	20-400	Anti-armour	6.7	Penetration in RHA (mm) > 350	Open/Red Dot
CS HP	Yes	20-300	Anti-armour	8.0	Penetration in RHA (mm) > 500	Open
CS RS	Yes	20-300	Anti-armour	8.0	Penetration in RHA (mm) > 350	Open/Red Dot
CS ER	Yes	20-500	Anti-armour	8.9	Penetration in RHA (mm) > 400	Red Dot/Intelligent
CS AST	Yes	20-400	Anti-structure	9.5	Blast/breach	Red Dot/Intelligent
CS HE	Yes	20-500/1000	Anti-personnel	9.0	Impact/airburst	Red Dot/Intelligent

In order to remain operational and effective, today's dismounted forces need ground combat systems designed to meet the requirements of highly specialised missions.

The new generation AT4 family of lightweight, shoulder-launched, off-the-shelf support weapons is the result of Saab's *thinking edge* in action. The family provides three variations that are designed to meet the changing needs of ground forces.

Present in more than 15 countries worldwide, the system is combat proven and provides the extended range required for mission success, including night capacity and confined space capabilities.

The product range includes anti-armour, anti-structure and anti-personnel/high explosive roles. With identical handling across all products, the AT4 family offers maximum versatility and ease of use – whatever the task.

ANTI-ARMOUR

The disposable AT4 anti-armour weapons for short range combat gives soldiers the ability to defeat combat vehicles with high penetration – and devastate their interiors. It combines easy handling, low weight and high muzzle velocity with impressive firepower and high armour penetration.

ANTI-STRUCTURE

The AT4 CS AST is a lightweight, recoilless, fully disposable multi-target weapon suited to close combat ranges. It provides the dismounted soldier with the capability to defeat the multitude of targets encountered in close combat urban operations.

ANTI-PERSONNEL

The AT4 CS HE (High Explosive) enables soldiers to defeat enemy troops in complex environments.

The weapon can be adjusted to operate in airburst or impact mode, providing the flexibility needed for a range of combat scenarios.
